

Customized solutions for Bioprocess productions

Single-use bags are ideal for streamlining R&D clinical large-volume and scale-up applications. Choose stock solutions, buffers, and media in various bag formats, including pillow bags, rocking bioreactor bags, and 3D process tank bags. Alternatively, have your custom formulations filled in bioprocess bags.

- Select from 2D and 3D bags (5-200 L) or totes from 500 L
- Minimize the risk of contamination
- Improve reproducibility
- Reduce bottle waste

- Flexible design for the optimum of media processing
- High-quality material for safe storage
- Reliable stability for safe transport

PAN-Biotech GmbH | Am Gewerbepark 6 | 94501 Aidenbach

PAN[™]
BIOTECH

- Buffers and solutions
 - Animal-free media

Volumes from 500 ml to 50 liter

Bag material

Multilayer film with EVOH barrier, PE contact layer

Bag tubing: PE

Tubing material

silicone

C-Flex

Filters

Sterile filters 0.2 or 0.1 μm

Filter capsules 0.2 or 0.1 μm

Connectors

CPC-coupling

Luer Lock coupling

Sterile coupling

Sampling ports (needle-less)

Sterilisation

Gamma (max. 25 kGy)

- Special culture media
- Liquid culture media

3D Bags

Volumes from 50 liter to 1,000 liter

Bag material

Multilayer film with EVOH barrier, PE contact layer

Ports

Flexible number of ports

Flexible port position

Filters

Sterile filters 0.2 or 0.1 μm

Filter capsules 0.2 or 0.1 μm

Tubing material

Silicone

C-Flex

TPE

Connectors

CPC-coupling

Luer Lock coupling

Sterile coupling

Sampling ports (needle-less)

Sterilisation

Gamma (max. 25 kGy)
